KEGG downregulated
Mucin type O−glycan biosynthesis
Leukocyte transendothelial migration
Growth hormone synthesis, secretion and action
Vasopressin−regulated water reabsorption
Other types of O−glycan biosynthesis
Adherens junction
Focal adhesion
Viral carcinogenesis

KEGG upregulated
Glycosaminoglycan biosynthesis
Glycolysis / Gluconeogenesis
Central carbon metabolism in cancer
p53 signaling pathway
PPAR signaling pathway
Sulfur metabolism
Synthesis and degradation of ketone bodies
Synaptic vesicle cycle
