KEGG downregulated
Cell cycle
Oocyte meiosis
Progesterone−mediated oocyte maturation
Fanconi anemia pathway
DNA replication
p53 signaling pathway
Cellular senescence
Human T−cell leukemia virus 1 infection
Pyrimidine metabolism
Mismatch repair
Homologous recombination
FoxO signaling pathway
Hepatitis B
One carbon pool by folate
Small cell lung cancer
NF−kappa B signaling pathway
Human immunodeficiency virus 1 infection
Base excision repair
MicroRNAs in cancer
Epstein−Barr virus infection
Prostate cancer
Steroid biosynthesis
Nucleotide excision repair
