Compartment enrichment from ST
Phospholipid biosynthesis
Cholesterol biosynthesis
Lipid biosynthesis
Steroid biosynthesis
Congenital disorder of glycosylation
Nucleotidyltransferase
Autophagy
tRNA processing
rRNA processing
Prenylation
Acyltransferase
Helicase
Mitochondrion inner membrane
NADP
WD repeat
Methyltransferase
GTP−binding
Lysosome
DNA replication
Lipid metabolism
Protein transport
Endosome
Transferase
Golgi apparatus
Serine/threonine−protein kinase
Endoplasmic reticulum
Nucleotide−binding
Mitochondrion
Ubl conjugation pathway
Kinase
Magnesium
ATP−binding
RNA−binding
Transport
Hydrolase
Acetylation
Disease mutation
Cytoplasm
Disease
Alternative splicing
Cell cycle
Phosphoprotein
Enriched compartments (fdr < 0.05)
